INTRODUCTION

Solid strength with delicate ease

Glass façades have a lighter and more inviting effect the more delicately they can be incorporated into the building's architecture. The new GEZE Slimdrive SL NT automatic sliding door system is ideal, particularly in glass façades in which there are large door leaves to be moved and all the components have to be delicately narrow.

At just seven centimetres high, the drive is the lowest on the market. It allows the Slimdrive SL NT to be almost invisibly integrated into the façade and can move leaf weights up to 125 kg. The guide rail is also new and can be easily fixed directly to the wall, façade or support beam. The leaf adjustment has been further optimised with a new roller carriage. The self-cleaning roller supplied as standard runs quietly and increases the life of the roller carriage. An additional track-supporting roller helps to prevent tipping.

The optional Bluetooth technology makes commissioning, service and door monitoring a breeze. All the drive parameters settings, diagnostics and default settings can be easily made from a laptop, while statistics such as opening cycles are simple to download. Password-protection and user-friendly documentation for the commissioning or maintenance report are also possible. The GEZEconnects software provides wireless data transfer between the Slimdrive SL NT door controller and a service laptop/PC.

GEZE offers a fast, skilled and comprehensive service.

PRODUCT BENEFITS**DIN 18650**

Slimdrive SL NT is fully type-tested to DIN 18650 and AutSchR, and is guaranteed to obtain planning consent. The proven GEZE DCU technology offers all the necessary sensor connection options and control solutions for almost all applications. On request, we can implement project-specific solutions at our own technology centre.

Other benefits of the new Slimdrive SL NT

- The roller carriages are accessible from the front, making installation and maintenance child's play. The cover can be detached, but is still secured in place. The vertical adjustment range on the roller carriage is now larger and more easily accessible. This saves up to 45 minutes at the installation stage compared to comparable door drives.
- The drive component module mounts can be prefabricated in the workshop and fitted in an instant, thus saving even more time.
- Even easier to use: can be controlled with all types of device, such as radio remote controls.
- The GEZE Slimdrive SL NT sliding door drive is also available as a kit version.

TYPICAL APPLICATIONS

- Banks and all buildings where appearance counts
- Hotels and restaurants
- Airports and stations
- Hospitals, retirement and care homes
- Trade fairs and car showrooms
- Public buildings, such as schools and colleges

**Can even be used in various combinations as emergency exit doors**

DIMENSIONS**Unique and only from GEZE: The 7 centimetre high drive!**

- Drive installation dimensions: 70 mm x 190 mm (height x depth)
- Drive type: single and double-leaf variants are possible
- Weight: up to 125 kg per leaf
- Opening width: single-leaf 700 mm to 3000 mm
double-leaf 900 mm to 3000 mm

TECHNICAL DATA

Slimdrive	SL NT	SL NT-FR
Movement parameters		
Opening and closing speed per door leaf	max. 0,7 m/s	
Hold-open time	0 - 60 s	
Automatically adjusts to through traffic	●	
Force limitation		
Variable opening and closing force	max. 150 N	
Automatic reversing when an obstacle is detected	●	
Ambient conditions		
Temperature range	-15 to 55 °C	
Enclosure rating	IP 20

Overview of the GEZE Slimdrive SL NT module

COMPONENTS

Slimdrive		SL NT	SL NT-FR
Parts			
(1) Transformer	Voltage	230 VAC +6% -10%	
	Frequency	50 / 60 Hz	
	Rated output	150 W	
(2) Locking system	On toothed belt, electromagnetic/bistable		●
(3) Control	Controller	DCU1	DCU1-2M
	redundant	○	●
	digital	●	
	with error memory	●	
	with memory for statistics	●	
	software update possible	●	
	with bus interface	○	
	with connection for fire alarm system	●	
	with output for external consumer	●	
(4) Backup power supply	Battery	●	
(5) Motor	single	●	○
	double	○	●
	torque	400 Ncm	
(6) Roller carriage	vertical door leaf adjustment	10 mm	
	horizontal door leaf adjustment	6 mm	
	with anti-tipping mechanism	●	
	self-cleaning	●	
(7) Side plates	integral cable inlet on both sides	●	
	side panel	○	
	stable cover fixing made permanent by improved mount	●

2-leaf door system**1-leaf door system****List of abbreviations**

B	Overall length
AL	Drive length
FB	Leaf width
FH	Leaf height
DH	Passage height
ÖW	Opening width
LB	Clear overall width
Vls	Left lock
Vrs	Right lock
STH	Height of side part

SLIMDRIVE SL NT

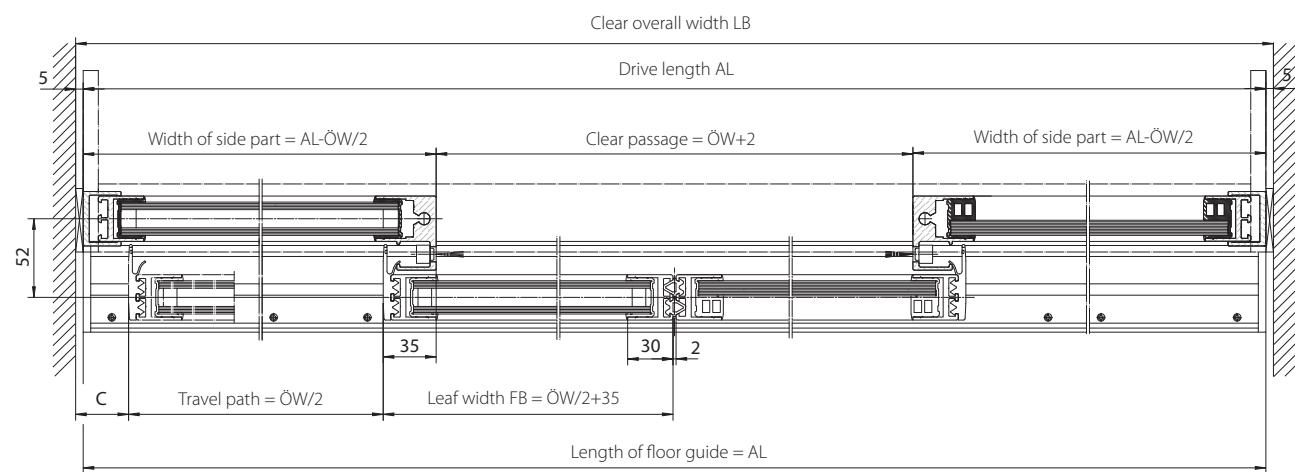

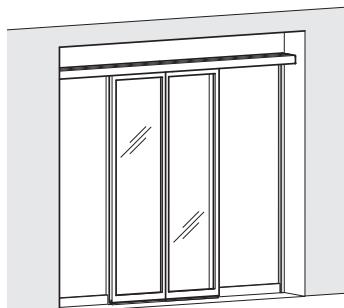

Drawing no. 70511-ep02

Slimdrive SL NT is available with two carrier variants for cantilevered installation. The low carrier is the same height as the drive, allowing it to be integrated very elegantly into the façade. The high carrier should be used for opening widths of 2000 mm or more as its robust design gives the door system greater stability. See the diagram on drawing 70511-ep02 to determine exactly which is the right carrier for your application.

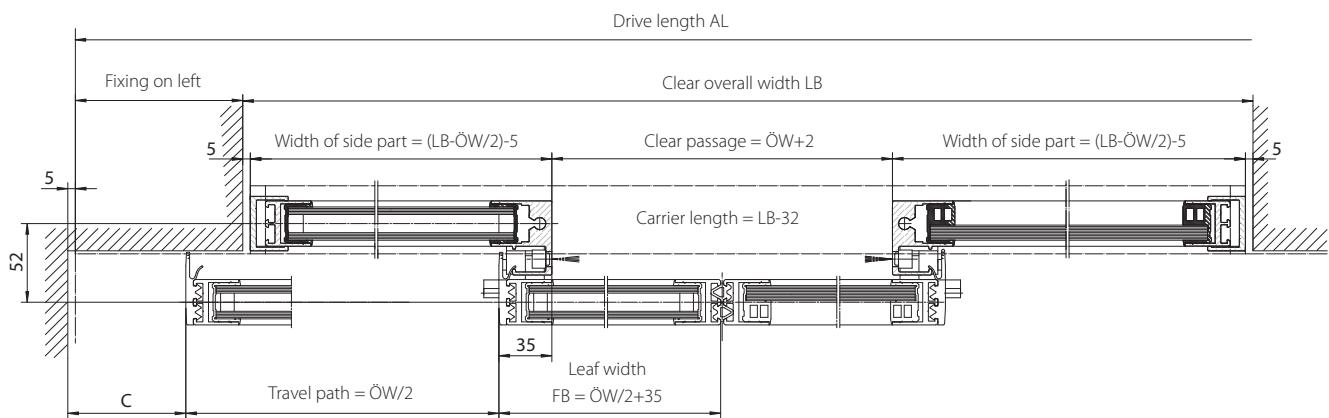

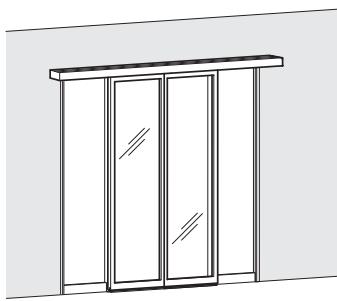

SLIMDRIVE SL NT

with safety leaf**

Cable plan DCU1, DCU1-2M

HS	Main switch
NS	Emergency stop button (optional)
DPS	Display programming switch
ST	Key programming switch
PS	Program selector
KA	Contact sensor, outside
KI	Contact sensor, inside
KB	Contact sensor, authorised
BM	Motion detector
SÖ	Safety sensor, "Open"
SM	Fault indicator Fault indicator lamp or klaxon
AÖ	Limited opening width
NÖ	Emergency opening
SIS	Light curtain with motion detector KA or KI
S/W	Draught lobby, draught-proofing
NV	Emergency lock

Notes:

- 1) Cable inlet through the side plate or on the left or right side, concealed from behind.
Avoid sharp edges or use edge protectors to protect the cables.
- 2) Max. cable length 100 m
- 3) Leave at least 5 m of signal cables and at least 2 m of power cables protruding from the wall.
- 4) Not for DCU1-2M
- 5) Required for DCU1-2M

Drawing no. 70484-9-9861

Certificate P-3470/09 (English Issue)

(valid only in association with the terms overleaf)

Holder of the certificate: GEZE GmbH
Reinhold-Vöster-Straße 21-29, 71229 Leonberg

Site of Manufacture: GEZE GmbH
Reinhold-Vöster-Straße 21-29, 71229 Leonberg

Type Approval Mark:valid until
2013-12-31**Product:** Automatic in-line sliding door**Model:** Slimdrive SL NT**Testing based****on the following:**

- DIN 18650-1/2: 2005-12
Locks and metal fittings - automatic door systems
- BGR 232: 2003
Guideline for power-operated windows, doors and gates
- DIN EN 60335-1: 2007-02
Safety of electrical equipment intended for domestic and similar use
Part 1: General requirements
- DIN EN 60950-1: 2006-11
Safety of information technology equipment
- DIN EN ISO 13849: 2008
Safety of machinery - Safety-related parts of control systems

All standards, regulations or guidelines named in the above-mentioned basic documents must also be considered valid.

Result of testing:

The demands made in the test requirements are fulfilled by the product.

Permission is hereby given to use the Test Mark illustrated above, in accordance with the contractual terms printed overleaf.

GEZE Jupiter R	GEZE Jupiter SV

**Radar motion detector**

for activation

of automatic sliding doors	in emergency exits and escape routes
GEZE GC 302 R	GEZE GC 302 SV

**Light curtains**

for protecting the main and ancillary closing edges
of automatic sliding doors

GEZE GC 333
GEZE Presence S

Program selector for selecting the operating status of automatic sliding doors

Display programming switch

Electronic user input using push buttons	Can be locked in emergency exits and escape routes
GEZE DPS	GEZE DPS-SCT

Programming keypad

Electronic user input using push buttons	Can be locked in emergency exits and escape routes
GEZE TPS	GEZE TPS-SCT

Mechanical program selector

Mechanical user input via rotary selector	Key-operated in emergency exits and escape routes
GEZE MPS	GEZE MPS-ST

The following modes can be set using the program selector:

Permanent hold-open mode

The door moves to the OPEN position and stays open. Motion detectors and opening sensors are deactivated.

Night mode

The motion detectors are set to inactive and the door closes.

Option: the door leaves are electrically locked to prevent them being forced open.

Shop closing time mode (one-way)

The door opens and only closes when a person goes out.

The outside motion detector is inactive, the inside detector is switched to active.

Automatic mode

The door opens as soon as the motion detector or sensor is triggered and closes again after a variable time. Safety sensors protect the door leaf travel path. If there is someone in the opening, the door will not close.

Reduced opening width mode

Activates or deactivates the settings made in Learn mode.

OFF mode (with TPS and MPS only)

The drive and sensors are switched off, but the door leaves can be moved manually.

Key-operated pushbutton

Program selector can be locked with a key-operated pushbutton (required on the FR variants)

Mobile, effortless commissioning and monitoring

SERVICE TERMINAL ST 220

Mobile, easily portable and uncomplicated. Programming the GEZE Slimdrive SL NT automatic sliding door system is simple with the ST 220 service terminal. The service terminal and sliding door terminal communicate and exchange data via an integral RS485 interface.

- Small size makes it easily portable: 80 x 125 x 37 mm (width x height x depth)
- Large, illuminated display with clear text display
- Read-out function for maintenance and diagnostic information
- IP 40 enclosure
- Powered via the door system
- Compatible with all drive and software versions from DCU software version 3.0 onwards.
- Password-protected to protect operating parameters and maintenance data against unauthorised changes.

New and impressive: GEZE automatic door systems with Bluetooth technology

GEZEconnects

Wireless connection! Bluetooth is an international, standardised short-range radio link with a range of up to 10 metres. The GEZEconnects software allows you to control and monitor GEZE automatic door systems wirelessly via Bluetooth. Programming, commissioning, monitoring and data updates are all easily carried out from a laptop or PC.

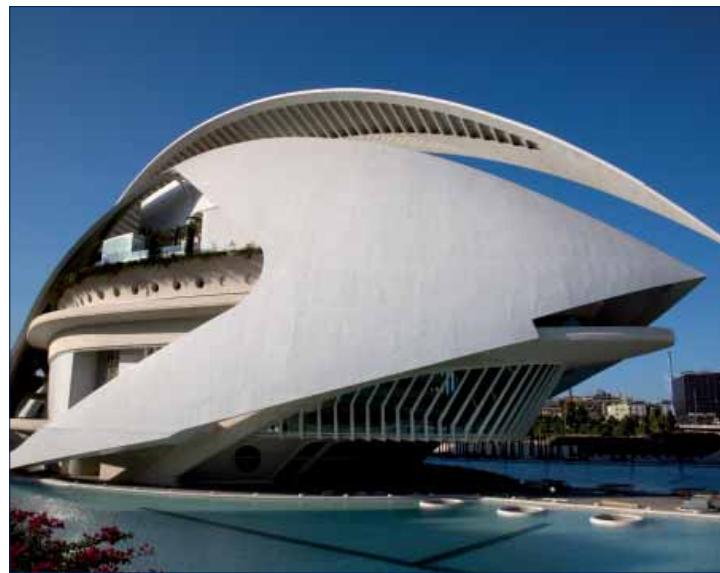

Other benefits of the forward-looking radio wireless technology

- Fast, efficient data transfer
- All default settings can be very simply adopted for other door systems.
- Time-saving updates possible for separate parameter settings.
- User-friendly documentation for commissioning, maintenance and diagnostic reports.
- All necessary statistics can be easily downloaded at any time.
- Password-protected to protect operating parameters and maintenance data against unauthorised changes.
